

Wood Sanding Products

Cloth and Paper Belts

MIRKA PREMIUM SANDING BELTS. The critical finishing process for most wood products begins with sanding, typically using cloth or paper belts. Mirka's premium belts are designed with durability and performance in mind; providing a smooth surface with minimal variation of the surface finish. The technology incorporated into the belts reduces excessive surface dust and minimizes raised fibers with the highest level of efficiency. Whether the belt is used for calibration or standardization of wood products, superior results can be achieved with premium belts from Mirka.
