

MR38CV Orbital Sander

For perfect surface finishing

The MR38CV is ideal for sanding small to medium size areas.

- 10,000 rpm air motor features composite rotor and blades for long-lasting performance with increased resistance to moisture in air supply.
- Vacuum-ready for use with central or portable dust collection systems using threaded 3/4" O.D. vacuum hose.
- 3mm orbital action sands quickly, and provides a uniform surface finish.
